TECHNOHULL® is a RIB manufacturer with excellent and innovative design and has been established in 2005.

The seaDNA999G5, is in its fifth Generation and provides several deck layouts. It has clever design and solutions that combine unique amenities for the size of the boat. All the right ergonomic features for a sport boat are here, to enhance and facilitate the long trips in any weather conditions. High quality materials are selected in the building and finishing process. Top quality gel coat colors, multi-axial fibers, high quality resins are standard in every boat.

Versatility, performance and an ever so close attention paid to detailing and materials. These are the concepts that are at the basis of all the RIBs produced by TECHNOHULL® and are all perfectly integrated in our best selling model.

The ergonomic center console is equipped with two wrap-around shock-absorbing seats, perfect for safe and controlled steering even in rough seas. The instrument panel includes a “Smart Central Console Touchscreen”.

A real “toy for boys”!

With a length of 10.3 meters and a beam of 2.8, the seaDNA999G5 can adapt to a wide range of owners. Several deck layout combinations are available.

Open: Here we have a V-shaped settee that conceals a spacious storage area, while the raised step at the peak considerably facilitates embarking and disembarking, making this version ideal as a tender for large yachts.

Delta: Perfect for relaxing daily use and enjoyable anchorages immersed in nature thanks to the sun-bathing area that covers the entire bow area.

Cabin: Dedicated to those who want to enjoy short cruises, this layout is characterized by a cabin with a double bed. Light and air are ensured by the two piece door and a large roof hatch. A nautical electric toilet is available for your convenience.
